

Developing leaders today!

Transform your students

Leadership Empowerment to Achieve Dreams

First and Goal, Inc. – L.E.A.D. Youth Leadership Conferences and Camps are designed to build today's youth into tomorrow's leaders. During the conference students will discuss the characteristics of a leader and their view of themselves as leaders. They will learn the importance of attitude, effective communication, creating positive change, setting goals, and formulating plans of action to achieve their goals. They will also focus on decision-making, which is one of the most important leadership skills, as well as learning to cope with and overcome the results of wrong decisions. The conference will provide students with the knowledge that will allow them to become effective leaders, as well as encourage them to strive for excellence in their lives.

The first person you lead is yourself

The future leaders of the world and society are sitting in your midst. Why wait. Give them the leadership skills and experience that they need to lead now!

First and Goal will come to your school or campus to provide personalized training for your students. During the sessions your students will be empowered with leadership techniques and skills. They will utilize these techniques and skills in practical large group activities and games, and walk away equipped with the necessary tools and resources needed to be the leaders that they are called to be.
